PROFESSIONAL SUMMARY

A motivated and detail-oriented Software Quality Assurance Engineer with experience in manual and automation testing of web and mobile applications. Seeking an opportunity to contribute to a dynamic organization by ensuring software quality, improving testing processes, and collaborating effectively within Agile teams. Eager to continuously learn new tools and technologies while delivering reliable, high-quality software solutions.

WORK EXPERIENCE

vativeApps
Mid-Level SQA Engineer

Karachi, Pakistan
April 2026 – Present

- Roles & Responsibilities:**
- Involved in manual testing of mobile and web applications across enterprise and product-based environments, ensuring end-to-end quality coverage.
 - Worked on platform-based systems and AI-driven solutions, performing module-level and functional validation across features.
 - Designed and executed comprehensive test cases covering positive, negative, and edge scenarios to ensure requirement validation.
 - Managed defect lifecycle activities, including structured bug reporting, prioritization, and verification after fixes.
 - Performed regression testing across release cycles to ensure application stability and consistent quality.

WeUno Technologies
Jr. SQA Engineer

Karachi, Pakistan
Jan 2025 – Present

- Roles & Responsibilities:**
- Performed in-depth manual verification of web and mobile applications, ensuring functional accuracy and interface consistency.
 - Assessed mobile software on various devices and operating systems to confirm stability and efficiency.
 - Administered basic load and performance tests using JMeter, evaluating system resilience.
 - Formulated comprehensive test cases, checklists, and test datasets to expand coverage and enhance quality.
 - Monitored defects via Proof Hub, maintaining precise records and ensuring timely follow-ups.
 - Communicated with development teams through Slack and actively took part in Agile/Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives.
 - Facilitated reduction of defect leakage by identifying issues at early stages of development.

Sapphire Consulting Services
SQA Intern & Trainee Consultant

Karachi, Pakistan
Dec 2023 – Dec 2024

- Roles & Responsibilities:**
- Carried out thorough functional checks of web applications to confirm usability, responsiveness, and system stability.
 - Upgraded and managed automation scripts using Selenium WebDriver for regression and functional validation.
 - Developed precise test scenarios and executed them across web and mobile platforms.
 - Executed regression, sanity, and smoke testing to ensure consistent application reliability after updates.
 - Documented defects using Redmine, keeping accurate logs for review and resolution.
 - Partnered with QA colleagues and developers in an Agile workflow to maintain high-quality standards throughout the software lifecycle.

EDUCATION

NED University of Engineering & Technology Karachi, Pakistan

Bachelor of Science in Computer Science 2019 – 2023

PROJECTS

UNIFIED MANAGEMENT AND SOCIAL SUPPORT SYSTEM

- Performed manual testing for both web and mobile applications.
- Designed comprehensive test cases to ensure robust functionality and user satisfaction.
- Implemented Selenium-based automation scripts to improve regression testing efficiency.

TRANSPORT REGULATORY OPERATIONS SYSTEM

- Conducted in-depth manual testing of a large-scale web application.
- Contributed to automation testing using Selenium, supporting regression and functional validation activities.
- Assisted in optimizing testing processes, improving accuracy and overall release quality.

ADDITIONAL

Technical Skills: Manual Testing, Regression, Sanity & Smoke Testing, UI / UX Testing, UAT, API Testing, Selenium WebDriver, Python, Java, Postman, JMeter, IntelliJ IDEA, SDLC / STLC, MySQL, Git.

Certifications & Training: QA Fundamentals.
